Education

Home University: Fudan University

Shanghai, CN
Graduate in 2026.06

- GPA: 3.91/4.00, Class Rank: 1/42, School Rank: 3/371
- Honors:
 - National Scholarship in the 2023-2024 term
 - Excellent Student in the 2022-2023 term

Experience

Shenzhen Shopee Information Technology Co., Ltd. Summer Internship – Data Analyst

Shanghai, CN
06/2025 – 09/2025

- Guide a project on “LFF (Local Fulfilment) Policy Analysis”, building a comprehensive causal model to analyze policy effects and integrating the model with AI agents for better usage
- Build AI agents with company platform to streamline workflow, including connecting data between google sheet and python notebook
- Give feedback to Notebook platform PM for data analysis optimization and better AI integration

Overseas Exchange Harvard University Visiting Undergraduate Student

Cambridge, MA
08/2024-12/2024

- Coursework: The Microeconomics of Development (Grade A); Introduction to Reinforcement Learning (Grade A); Applied Bayesian Statistics (Grade A-)

Fudan International Summer Session Teaching Assistant of the Course *Banking and Financial Technology*

Shanghai, CN
07/2024

- Collaborate with Professor Felix Irresberger from Durham University on course content preparation
- Help with grading of students' problem sets and exams and hold office hours with the professor

Harvard Summit for Young Leaders in China Teaching Fellow and House Leader

Shanghai, CN
07/2023 – 08/2023

- Discuss with Eduardo Vasconcelos to deliver a course on entrepreneurship and social-impact startups
- Design class activities for different class types and recommend additional case studies to help students understand how they could navigate team-building, business plans, and the Environmental-Social-Governance framework
- Organize house bondings with other teammates to build sense of honor within houses with house cheers, daily house bondings, house games and house farewell meeting

Leadership & Activities

Fudan Floorball Association Co-Founder/President

Shanghai, CN

- Recruit and build the first core team of Fudan Floorball Association
- Publicize through different channels and attract enough students for weekly training and competition at province level
- Whole Association over 100 members

Leader of Mathematical Contest in Modelling Meritorious Award

Shanghai, CN
01/2025

- Develop a data-driven model for medal counts prediction at the upcoming Los Angeles Olympics
- Incorporate distinct predictive approaches based on countries' historical medal performance
- Enhance model robustness by accounting for special factors such as the "Great Coach" effect

Volunteer Teaching Leader		Yunnan, CN 01/2024 – 02/2024
- Recruit the assistant teaching team and organize the course schedule to align teammates' abilities with school's requirements - Design evening parties, special sports meetings and singing competition to help students develop communication skills, leadership and artistic talent		
Research		
Selected Research Assistantship		
The Incidence of Distortions		Cambridge, MA
<i>Advisor: David Atkin, Professor from MIT</i>		10/2025-NOW
- Perform statistical matching between the cleaned Chile's national survey data and government's administrative tax data to incorporate the informal production and consumption of the economy - Ensure the matching quality by comparing the distribution of key variables over demographics so as to guarantee the accuracy of estimates of wedges		
Emigration during Turbulent Times		Shanghai, CN
<i>Advisor: David Young, Professor from Harvard</i>		03/2024-05/2024
- Retrieve information of land value from the official website of Shanghai Municipal Archives - Use OCR to extract values from the screenshots of the Land Assessment Schedule and clean the raw data into structured format, facilitating the analysis of land price's impact on emigration		
Collaborative Research		
DIRT: The Distributed Intelligent Replicator Toolkit		Cambridge, MA
<i>Collaborator: Aaron Walsman, Postdoc from Harvard Kempner Institute</i>		11/2024-05/2025
- Design and implement a highly configurable grid world dynamics with multiple sensor types, complex terrain, water features, and a climate system - Simulate mobile agents in the environment that must consume resources in order to survive and reproduce - Stabilize the environment and agent behavior with tests and parameter tuning		
Project Based Learning (MIT BLENDED LEARNING)		
Perspectives in Quantitative Finance - Morgan Stanley Project		SH, CN
<i>Advisor: Yu Sheng Loh, PhD from Nanyang Technological University</i>		02/2024 – 06/2024
- Learn Stochastic Calculus for the analysis of security prices and yields - Use Black-Scholes Models to practice pricing the American options - Design a structural product to meet specific needs of an agent with related pricing and risk analysis		
Individual Research		
How Setting Up Girls' Schools in 1900 China Affects Gender Norms and Labor Supply		SH, CN
<i>Advisor: Xuejing Zuo, Associate Professor from Fudan University</i>		09/2023 – 01/2024
- Retrieve datasets from the school's library and clean the data with R - Quantify the effect for different regions in China at that time with graph made in PYTHON - Depict trends in different times with different policies and their further implicatio		
Skills & Interests		
Technical: Python, STATA, R, Gephi, MATLAB		
Language: GRE 339/340, TOEFL 108/120, The Most Impressive Award in Classic English Speech Competition		
Interests: Strategic board games, Sports, Reading
